Response to Arguments

Applicant's arguments filed 03/29/2010 have been fully considered but they are not persuasive.

Regarding Applicant's arguments (Page 30 of the Remarks [0014]), the Examiner would like to bring to Applicant's attention that the claimed "identifier" as recited in the claim's language reads on the caller Id information which is already taught by Barile and discussed in the final office action mailed to Applicant. Also, Cope was introduced to associate the location with conference participants within a conferencing system. Cope features were already discussed in the final office action mailed to Applicant. Thus, it

appears from Applicant's arguments that the Applicant is arguing each reference individually and not considering the 35 U.S.C rejection as a whole.

Applicant also adds (Page 30 of the Remarks [0014]), that "The Office agreed the routing system described in Cope reference did not disclose or suggest the use of a user interface or that the geographic location processing was related to identifiers that could be displayed on a user interface". First, the Examiner is unaware where did the office action recited this language. Second, the office action already indicated that the use of an interface is already taught by Christie and the claimed "identifier" which reads on the called Id is already Barile. Also, in Cope the claimed "identifier" can also reads on the ANI wherein the caller number can be correlated to a physical location (See Cope, col. 5, lines 12-19).

Examiner believes that all other arguments are already addressed in the final office action that was mailed 02/03/2010.
